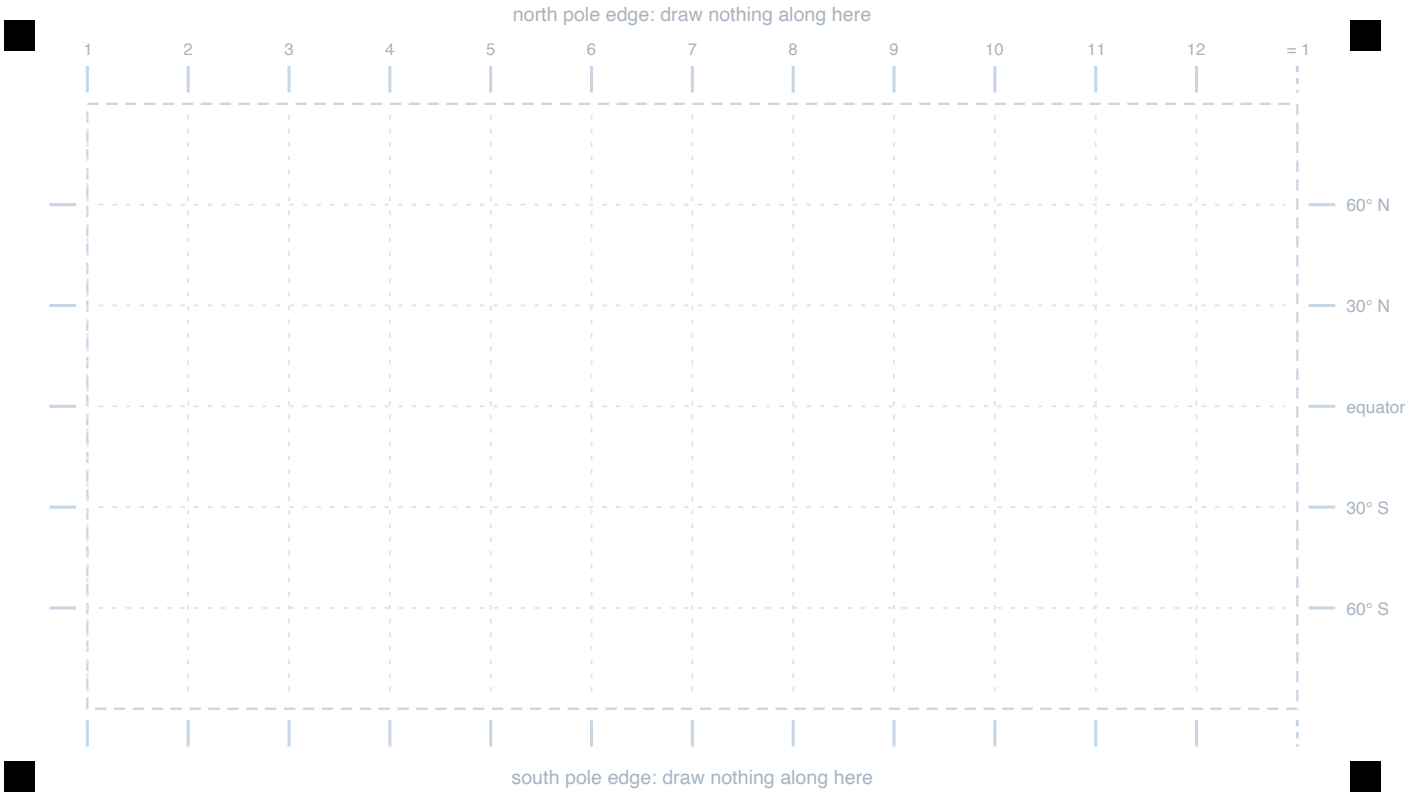
Hand Drawn · globe sheet

Draw over the light blue guides with your marker; the guides drop out when the photo is read.

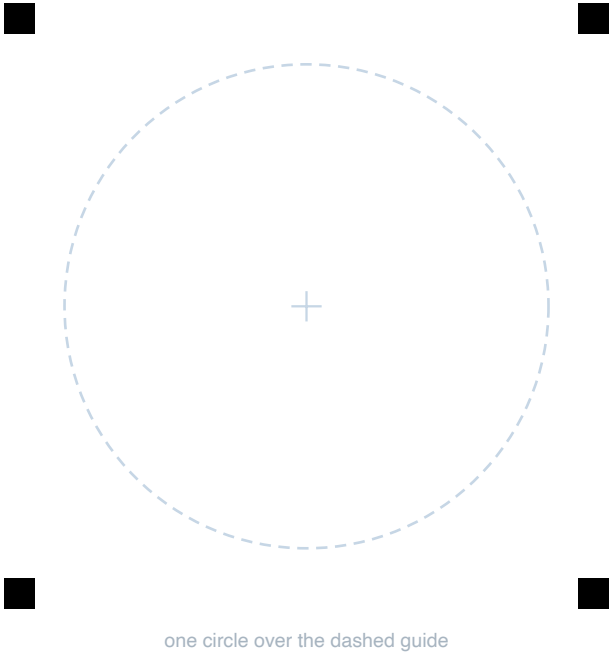
Map: 12 straight meridians top to bottom, 5 straight parallels side to side. They stay parallel on paper; wrapping round the ball makes them curve.

Wobbles and gaps are welcome, and doodles on the map roll with the ball.

MAP



RIM



Print at actual size (100%, no scaling), landscape. Photograph flat in daylight on a darker surface, with all eight black squares in view.
